For many avid gardeners in the northern plains, growing our favourite plants is a year-round pleasure. Our newest edition shows gardeners how to use indoor and outdoor techniques to enjoy gardening through all the seasons.

For indoor garden enthusiasts there are tips on how to best grow your house plants, from proper lighting, watering, and fertilizing techniques to using the correct growing media. Why limit your vegetable garden to the outdoors when you can grow lettuce and microgreens indoors for year-round consumption? Also, how to use indoor gardening to enable and maximize annual and perennial plant growth outdoors. Or if you want to completely defy the elements, find out about a greenhouse specifically designed for our harsh prairie winters

As always, this edition contains many articles of general interest. Read about getting the most out of ‘supermarket’ miniature roses, how to grow an inexpensive hedge, going from weeds to a tall grass prairie in just one year, growing berries in tunnels, and much more. And learn how hügelkultur can transform areas of poor soil into a gardening oasis.
